

IN THE CLAIMS

Please cancel the second claim numbered 18, claim 19, and claim 20.

Please amend the claims as follows:

1. (Original) A method comprising:
receiving a message including a request;
identifying a connector based on a keyword in the message;
performing an action identified by the connector;
sending a response including the data to the requester.
2. (Original) The method of claim 1, wherein the message is an electronic mail message.
3. (Original) The method of claim 1, wherein performing an action comprises:
accessing a web page identified by the connector; and
filling in a form on the web page.
4. (Original) The method of claim 1, wherein performing an action comprises:
accessing a web page identified by the connector; and
obtaining data from the web page.
5. (Original) The method of claim 1, wherein performing an action comprises:
accessing a web page identified by the connector; and
downloading data from the web page.
6. (Original) The method of claim 1, further comprising:
identifying a keyword in the request designating a destination for the response; and
sending the response to the destination.

7. (Original) The method of claim 6, further comprising:
sending an acknowledgement to an originator of the request, after the
response is sent to the destination.

8. (Original) The method of claim 1, wherein the keyword indicates
one or more of the following: an action to be performed, data to be downloaded,
and a destination for a response to the request.

9. (Previously Amended) An apparatus comprising:
a parser to identify a keyword in a message received from a user and to
identify a connector based on the keyword;
a connector file to indicate an action associated with the connector;
an action logic to perform the action; and
a communication unit to send a response with a result from the action.

10. (Original) The apparatus of claim 9, wherein the message and the
response are email messages.

11. (Previously Added) The method of claim 1, wherein the request is
received from a hand-held device.

12. (Previously Added) The apparatus of claim 9, further comprising:
a web action executor to access a web page identified by the connector
and to fill in a form on the web page.

13. (Previously Added) The apparatus of claim 12, wherein the web
action executor further includes a browser to access a web page identified by the
connector and obtain data from the web page.

14. (Previously Added) The apparatus of claim 13, wherein the browser is further to download data from the web page.

15. (Previously Added) The apparatus of claim 13, further comprising: a web page filtering mechanism to filter the data obtained from the web page, the web page filtering mechanism to create a response readable by an originating device.

16. (Previously Added) The apparatus of claim 9, further comprising: the parser further to identify a keyword in the request designating a destination for the response; and the communication unit to send the response to the destination.

17. (Previously Added) The apparatus of claim 16, further comprising: the communication unit to send an acknowledgement to the user, after the response is sent to the destination.

18. (Previously Added) The apparatus of claim 9, wherein the keyword indicates one or more of the following: an action to be performed, data to be downloaded, and a destination for a response to the request.

18. (Cancelled)

19. (Cancelled)

20. (Cancelled)

21. (Re-presented – formerly independent claim 18) A system to provide web access to a limited display device comprising:

a communication unit to receive a message from the limited display device, the message including at least one keyword;

a parser to identify the at least one keyword, and to identify one or more connectors based on the keyword;

a connector file to indicate one or more actions associated with each connector;

a browser to access a web page;

a web action executor to execute the one or more actions specified by the one or more connectors, on the web page, and obtain a result; and

the communication unit to send the response with a result from the action.

22. (Re-presented – formerly dependent claim 19) The system of claim 21, wherein the limited display device comprises one of the following: a one-and-a-half-way pager, a two-way pager, a hand held device, or a cellular telephone.

23. (Re-presented – formerly dependent claim 20) The system of claim 21, further comprising:

a web page filtering mechanism to format the result into a format readable by the limited display device.
